1. Basic IR policy

TOA Corporation (TOA) strives to ensure fair, timely and clear disclosure of information about TOA's financial results, financial position, and future vision so that TOA's shareholders, investors, and the general public can have a good understanding of TOA's management and business activities and have confidence in TOA.

2. Basis for information disclosure

TOA's disclosure is in accordance with the Financial Instruments and Exchange Act of Japan and the timely disclosure rules of the exchanges on which TOA is listed. In addition to statutory disclosure, TOA strives to proactively disclose information in a fair and timely manner that is considered to be necessary for the shareholders and investors in order to deepen their understanding of TOA.

3. Disclosure method

TOA discloses the information subject to the timely disclosure rules on the Timely Disclosure Network (TDnet) operated by the Tokyo Stock Exchange and on the TOA website. In addition, TOA discloses information that is not subject to the timely disclosure rules by means of press releases and on the TOA website. If you wish to have access to all the information disclosed by TOA, you are advised to use TDnet and other sources in addition to the TOA website.

4. Forward-looking statements

Information disclosed by TOA may include forward-looking statements that are projections based on the information currently available. Actual results may be materially different from these statements owing to changes in the economic situation and other factors. TOA strives to improve the accuracy of forecasts and discloses information as necessary if forecasts are to be changed.

5. Quiet period

In order to prevent unauthorized release of earnings information and to ensure fairness, TOA refrains from IR activities during the period from the day following each quarterly period-end to the date on which financial results for the given period are announced. During these quiet periods, TOA refrains from responding to questions about or commenting on the forecasts of financial results. However, if it is likely that financial results will greatly differ from the publicly announced forecasts, TOA will make an announcement.

The TOA website is not for the purpose of soliciting investment in TOA. You are requested to make your own judgment regarding any decision on investment.

Although TOA exercises due care about the accuracy of information on the TOA website, TOA does not guarantee and shall not be held liable or responsible for the accuracy of any information on the TOA website.

Creating solutions in Sound and Video

TOA's business is shaped by three factors-Sound, Video, and Networking.

TOA has manufactured industrial- and professional-use audio equipment since the company's founding in 1934. In the eighties we evolved, leveraging our technological expertise to advance into security equipment including surveillance cameras. We now stand firmly established as a specialist maker of equipment in two fields: sound and video.

With the digital era in full swing, the proliferation of digital and networking technologies continues to open up new possibilities in both of our business fields. At TOA, by creating solutions woven from sound and video, we aim to be capable of offering new values that could never be realized with the manufacture of devices in one area alone. This is our aspiration.

The TOA logo

TOA's corporate mark and logo symbolize TOA's "T" and highlight our four corporate principles. We at TOA aim always to be progressive, modern, international, and dynamic.

Delivering Sound Pleasing to the Ear

Think of all the sound that you hear every day without ever thinking about it. Announcements, bells, background music . . . The list goes on, and at TOA our business is to manufacture a wide range of audio equipment that enables you to experience all of this sound in the greatest possible comfort and with the greatest possible enjoyment.

We began producing microphones in 1934, when they were still a rarity. Since then, we have continued to fulfill Japan's sound needs as a leading manufacturer of commercial- and professional-use audio equipment. Domestically we hold top shares in a number of markets, including those for airport PA systems and emergency PA systems for large-scale facilities—products for which technological excellence is an absolute must. In addition, we export our products to 120 countries.

Through sound, we at TOA contribute to the improvement of society for the benefit of everyone.

TOA's commercial- and professional-use audio equipment

Coaxial array speaker

Combines superior acoustic properties with high versatility. Suitable anywhere from conference rooms to sports facilities.

Digital power amp (high output model)

Delivers 2,200 watts of power with only one-third the power consumption of analog models.

Ahigh spec model with the toughness demanded by pros.

The TRANTEC brand of music-use wireless microphones

Offers the superb sound quality loved by so many musicians. A gem truly worthy of the description "high-end brand."

Applying the video technology to the building of social infrastructure

Security cameras help guard us against harm in our everyday lives. At the core of TOA's security business, these devices are becoming more and more prevalent as the myth of Japan as a "safe country" continues to break down.

TOA's goal in this growing market is to provide high-value-added security solutions utilizing digital and networking technologies. Safety entails not only protection from physical harm but also disaster readiness and safeguards for the well-being of all. We will continue to support safety-related infrastructure in these areas by making full use of the remote surveillance technologies honed in our security business.

TOA's security equipment

The Compact V series color cameras, with infrared LED light

A basic model offering high cost performance. Infrared night vision function and the added advantage of low power consumption.

Digital video recorder for use with security cameras

Many hours of continuous recording at high resolution. Control of up to 128 cameras possible by linking eight digital video recorders.

The Netcansee Video Network System

Transmits video over a network in real time. Centralized remote monitoring system covers wide areas and multiple locations.

LEAD

Competitiveness for a Global Market

To all of our stockholders and investors, I hope this message finds you in the best of health and prosperity!

While the economies of the world, and particularly those of emerging nations, now seem headed toward recovery, there remains enough instability that I think we still must temper our optimism to some degree. That said, our business has been recovering, mainly through increased overseas sales, and we're continuing to push forward toward the goals of our 6-year medium-term management plan (FY2009-2014).

In particular, our general-purpose PA systems, which have been our mainstay since 1934, comprise one of our greatest strengths in this global market. To meet the needs of our global customers even more precisely, we are heavily involved in a program of "close localization" of these and other products, including localizing all aspects of operations, from research and development to manufacturing to sales. Our vision of "an alliance of five companies each closely tied to its region," as set forth in our current medium-term management plan, represents the ideal of where we'd like to pursue this strategy fully to its logical conclusion.

Theworld at large is full of business opportunities, and one of the most recent is the sudden expansion of railway-related projects. We've been pursuing these projects aggressively, and just recently succeeded in selling TOA products to a major subway system in the United States. This field is very interesting for us, because in addition to public address systems, it also represents a strong potential market for the security products we've done so well within our Japanese markets. In European Union, too, we're starting to come into our own in the field of emergency broadcasting.

As a Japanese company, it's almost impossible for us to continue real growth without expanding our overseas market share. So while we'll continue reinforcing our management and product development functions here in Japan, we'll also be working hard to optimize our global supply chain, strengthen our quality assurance capabilities, and in general shore up the foundations of our competitiveness on the world stage.

Performance

Sales Recovering at Home and Abroad, Profits Expanding

What's the business environment been like so far this year (as of the end of the 3rd quarter of FY2010)?

The economy in Japan has been looking up, relatively speaking, partly due to the eco-point system and other government stimulus activities. But these are simply policy based "economy creation" measures, and for a company like ours that's so reliant on B-to-B transactions the environment has stayed pretty tough. Our export performance, too, has been hampered by the strong yen's climb down into the low 80s against the dollar. On the other hand, overseas markets are booming-there's been particularly conspicuous growth in China and other parts of Asia, and Europe, too, has been positive overall.

So even amidst all that, TOA has been headed toward significant recovery?

Consolidated sales are up 7.0% compared to last year at this time (as of the end of the 3rd quarter of FY2010). Domestically, we've seen growth in IP-based notification systems and related products for regional municipalities, and we also installed the public address system in the new international terminal at Tokyo's Haneda Airport. Abroad, we've already taken the lead among our competitors in earning certification under the new EN 54-16 European Emergency Evacuation System Standards-which will become mandatory as of March this year-so our sales in the emergency broadcast system market there have been holding fast. In China, our success with major installations like Expo 2010 Shanghai did a lot to boost the TOA brand there. And in the Asia-Pacific region we've set up new sales companies, in places like Indonesia and Thailand, and as a result sales have been growing at a good pace there, too.

Operating profits, too, have suddenly recovered along with increased sales. We made some human resources investments, so expenditures on sales administration are up somewhat year-on-year, but even so profits have grown more than we expected.

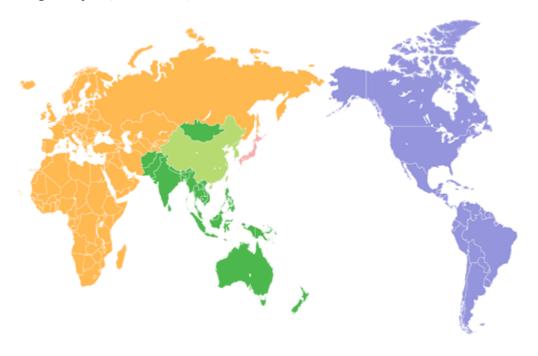

Has TOA been implementing any cost-cutting measures?

Yes, but instead of just going at it piecemeal, cutting purchasing and staffing costs and so on, we've actually been doing a complete review of our entire supply chain to find out how we can cut costs more comprehensively. Our goal is to get rid of every bit of waste and see how well we can optimize the flow of materials.

At the root of this effort is how we think about holding materials and products in inventory. My belief is that "inventory equals time." There's a certain time lag between when we manufacture a product and when we sell it. Inventory is what we use to compensate for that time lag.

In an attempt to reduce this time lag, our production and distribution departments have been analyzing and improving how our factories operate in each country and region around the world, basically by moving toward "close localization." Reducing excess distribution lets us shorten production lead times, and that in turn reduces what we need to keep in inventory. Also, localizing the flow from product planning to production to sales will help us achieve the vision of "an alliance among our five closely localized regions" called for in our 6-year medium-term management plan (FY2009-2014).

Railway Business

TOA Rides the New York Subway, Delivers PA Systems to High-Speed Rail Stations in China

What kinds of business has TOA been doing overseas lately?

The biggest topic lately is an order for train car PA systems that we've received from one of the companies that makes train cars for the New York subway system. We're aiming to build on that to continue getting our products into other subways as well. I think this project will serve us well as a strong jumping-off point into the global railway car market, as a new business, so we're pretty excited about it.

Railways in general are lately being reappraised, all around the world, in terms of their relative safety, cost efficiency, lower environmental impact, and so on, and in particular there are a lot of major high-speed rail projects under development. Given how high-profile the New York subway system project is for us, I think we'll be able to use it to our advantage in other parts of the world. The PR effect alone is profound, and success will also be very motivating for our employees. We'll

be doing other railway projects in the United States, and then building on those to get our sound and security systems into other railway systems all over the world.

Will TOA have opportunities to expand its railway business in China as well?

We're starting with the train stations for the high-speed rail systems around Shanghai. We've installed public guidance PA systems in seven stations on the Hanzhou line and eighteen stations on the Nanjing line, and we're working on similar projects for the Beijing line.

If you go just a short way into the Chinese interior, you'll find very few public transportation options besides buses. That means there's still quite a bit of room for major development. As a nation China has been investing a lot in improving its infrastructure, and the market is ballooning accordingly. But, as in every country, when it comes to public works projects, companies that already have good track records get noticed and valued most, and for that reason we've been working hard to take the initiative over our competitors in building a strong portfolio of successful projects.

In the near future, railway infrastructure improvements are likely to give rise to urban areas with populations of a million or more people springing up around major train stations. Naturally, these will include countless new buildings and other kinds of construction. We intend to use our successes with the Beijing Olympics and the Shanghai Expo, and with high-speed railways, to get our systems into those new buildings. If we can do that, our performance is bound to grow right along with growth of the Chinese market.

With all this in mind, we've been putting a lot of effort into developing region-specific products that can meet local needs more precisely. We recently did a customer call PA system for banks, which was simple but successful nonetheless, and we'll be continuing this move toward local development, local production, and local sales.

New Government Demand

Increasing Security Consciousness Boosts IP-Based Notification System Sales

How are things going in Japan?

We've had some growth in IP-based notification systems for regional municipalities. These are communications systems linking public offices, private homes, and public facilities using the local IP networks that have been built by municipalities and other government bodies. In this quarter alone we've had almost forty orders for such projects. This is pretty high compared to our performance for the same period last year.

In the last few years, Japan has had problems with floods and other natural disasters, and these have spurred a growing safety and security consciousness among municipal governments. Our systems are very well matched to the Ministry of Internal Affairs' "J-ALERT" simultaneous nationwide emergency notification system, and this has also helped us spread our systems domestically. One feature of our IP Notification System is that it can start up and begin broadcasting almost instantly, so it's very effective in issuing the kinds of immediate notifications required in emergency situations like earthquakes, where speed is of the essence.

We think this emphasis on safety among local municipalities will continue for a while. We've also seen markets in Asia starting to follow these Japanese trends. A number of Japanese manufacturers are planning to use overseas development assistance (ODA) to export safety-related facilities abroad, and we, too, will definitely be looking into that option as well.

Toward the Future

Putting TOA on the Growth Track

What measures is TOA taking toward the future?

If we're going to achieve what we set out to do in our 6-year medium-term management plan, then this year has to put us on the road to growth. One of the most pressing issues for us now is to speed up our product development.

At this very moment we're undertaking a comprehensive reevaluation of our development procedures. There are a lot of ways of doing things that we've inherited from past generations of staff in the development department; but the changing times have made some of these things unnecessary, and certain "unwritten rules" and so on have become obsolete. We're getting rid of a lot of these and replacing them with new methods better suited to today. To the staff in general

I've been saying, "Forget the past. Work like you're building a brand-new company!" Our mission now is to reduce product development times dramatically, so that we can respond quickly and efficiently to changes in our markets.

Speaking Freely

Corporate Sensibilities" Permanently Engraved in TOA's Regional Contribution

TOA recently received the Mécénat Award Granted by the Commissioner for Cultural Affairs.

Yes, it's the second time we've received such an award, the first being the Grand Mécénat Award in 1995. Apparently there are only two companies that have earned this award twice, so the recognition really is a great honor.

The Mécénat award was given for our TOA Meet! Music! Concept, which is a program we've created to bring children into contact with music. This involves five different Mécénat activities, among them supporting junior and senior high school students in participating in Kobe Jazz, and in this way we've been making efforts to support local culture for over ten years now. I don't think we're doing anything particularly special, but it's part of us and we're sincere about it, so that may be why our efforts have been so well received. And in any case, this award isn't something you aim to get, it's more like something that comes to you as a result of honest, steady efforts.

We've always supported music and musicians, as is evidenced by the fact that we built our own music hall, Xebec Hall, as part of our headquarters building in Kobe. A consciousness about contributing to regional music culture has long been engraved in us as part of our "corporate sensibilities." We're a purveyor of "sound," after all, so it's only natural that we continue to use sound to support the city of Kobe's artistic culture.
